## 8. Frequently Asked Questions

### Why do prices increase 10% annually?

Our costs increase annually — salaries, infrastructure, and regulatory tools. The 10% increase is fair, transparent, and significantly lower than the industry average of 20–30%. We commit to never exceeding 10% so you can budget predictably.

### Can I switch between billing frequencies?

Yes. You can change your billing frequency at any renewal period. We will align your next invoice to the new schedule. Each frequency carries the same annual total cost.

### What if I need to add a country mid-year?

Adding a country costs \$3,000 per year. We prorate it for the remainder of your current term and add it to your next regular invoice. Example: add a country with 6 months remaining = \$1,500 added to your next invoice.

### How do upgrades and downgrades work?

Upgrades: pay the prorated difference immediately and switch plans. Downgrades: receive a credit applied to your next billing cycle. Both calculate based on days remaining in the current billing period.

### Can I cancel anytime?

Yes, with 30 days' written notice. Monthly plans: cancellation effective at the end of the notice period. Quarterly/Annual plans: prorated refund for complete unused billing periods. No penalties for cancellation.

### Which plan should I choose?

Book a free 20-minute assessment. We will analyse your business and recommend the right tier. No pressure, no obligation — just honest advice. Most clients operating in 1–3 countries start on Essential; those managing 3+ countries or preparing for institutional due diligence typically choose Global.

### Do you work with my industry?

Yes. We serve all industries — from technology and healthcare to manufacturing, retail, professional services, and beyond. We have pre-built compliance frameworks for 40+ sectors.

### **What is your SLA if you miss a deadline alert?**

You receive an automatic 5% credit on your next quarterly payment — no claim required. Maximum 2 credits (10%) per quarter.

### **Can I request a customised service outside the standard plans?**

Yes. BenchBrex now accepts bespoke engagement requests — including single-country packages, project-based engagements, retainer-plus-project hybrids, and white-label delivery. Contact us to discuss scope and pricing.
