## About BenchBrex

BenchBrex combines expert networks, dedicated teams, and proactive monitoring to deliver comprehensive compliance solutions for businesses operating globally.

## Our Core Strengths

- **Expert Network:** Compliance specialists in 50+ countries including the US, India, UK, EU, Singapore, Canada, and Australia
- **Dedicated Team:** Personal compliance coordinator who owns your account end-to-end
- **Proactive Monitoring:** Real-time tracking of regulatory changes affecting your business
- **Proven Track Record:** 1,000+ companies served across industries including SaaS, Fintech, HealthTech, and E-commerce

**Mission Statement:** Transform compliance from a chaotic, expensive burden into a streamlined, automated advantage.

## The Problem We Solve

Managing compliance across multiple countries presents significant challenges for growing businesses. According to recent industry research, the global regulatory and compliance management consulting market is projected to grow from \$19.2 billion in 2025 to \$33.7 billion by 2034, driven by increasing regulatory complexity.

## Common Compliance Challenges

- **Regulatory Uncertainty:** You don't know which regulations apply to your business in each country
- **Expert Access:** You can't find reliable compliance experts in every jurisdiction you operate
- **Vendor Management Chaos:** Managing multiple consultants is chaotic and expensive with no single point of accountability
- **Deadline Risks:** You miss critical deadlines and face penalties
- **Audit Readiness:** You're never audit-ready when regulators or investors come calling

Traditional compliance approaches are expensive and fragmented. Big Four consulting firms charge \$300,000-\$1,000,000+ annually for multi-jurisdiction support, creating significant barriers for mid-market companies.

**BenchBrex solves this with a unified, cost-effective approach.**
